NICE SiraView

## View Multiple CCTV Video File Formats with a Single, Intuitive Interface

TRUTH DEPENDS ON IT ™

Making different types of video playable

NICE SiraView is the ultimate CCTV viewer, enabling users to view multiple CCTV video file formats with a single, intuitive interface. Dispensing with the need for manufacturers' proprietary viewers, SiraView is a unique decoding application, preserving the evidential quality of the CCTV footage.

FEATURES

View Hundreds of CCTV Formats with no Loss of Quality

Universal CCTV viewer - NICE SiraView facilitates the playback of multiple CCTV formats within a single intuitive user interface. Our software preserves the original evidential quality of your footage, while offering simple, high-volume, cost-effective navigation between multiple sources.

Instant Viewing

Instant viewing - View CCTV footage on a PC in its native format, full multiplex viewing on one screen and in most cases with all the meta data displayed. No more unproductive waiting for crucial evidence to be converted and uploaded to the cloud before it can be viewed.

Fast Retrieval with Automatic Optimization

Automatically recognize the file extension of any supported CCTV footage - with NICE SiraView you don't have to search for the right player every time. Whether you're dealing with a major incident with hundreds of CCTV sources or a single piece of footage, NICE SiraView's consistent interface makes it quick and easy to load, access, review and synchronize your evidence.

Hassle-Free Export and Sharing

Easy to export video and single frames as still images - in BMP or JPEG format or send them directly to a printer. Exported or printed images can also display camera, time and decoder information. Video sequences can be burned directly to DVD, or converted and saved to formats including QuickTime, MPEG and H.264. Multiple camera streams can be exported simultaneously into other software packages such as for facial recognition or motion detection.
Easy Storyboard and Bookmarking

Bookmark and storyboard features - enable efficient labeling and referencing of clips. Using our split-screen viewer, you can navigate through your footage and mark up pertinent events as you go, by adding clips onto your storyboard. Each clip retains its original metadata, ensuring easy and reliable referencing to your source material to guarantee evidential quality. Storyboard clips and data can be organised by date, subject etc., according to your needs, and can be readily recalled.

Intuitive Navigation

Simple and instinctive navigation - gives you precise control over your CCTV video. The dual-slider technology allows you to skip and reverse rapidly to an approximate point in your footage, before fine-tuning or stepping through sequences a frame at a time as you comb for detail. Simple keyboard shortcuts enable you to jump directly to a date or time, saving you the fuss of scrolling through volumes of material.

Seamless Integration with NICE Investigate

Integration with NICE Investigate - the market leading digital evidence management solution. Automate your entire digital investigation and evidence management process, and help your investigators close more cases faster.

Playable Formats and Accreditation

Extensive list of CCTV playable formats - available on request. NICE SiraView can be used as part of an ISO 17025 accredited laboratory.

About NICE Public Safety & Justice

With over 3,000 customers and 30 years' experience, NICE helps all types of public safety and criminal justice agencies, from emergency communications and law enforcement, to prosecutors and courts, digitally transform how they manage digital evidence and data from beginning to end, to get to the truth faster.

NICE's Evidencentral platform features an ecosystem of integrated technologies that bring data together to give everyone a single view of the truth, enabling public safety and justice agencies to do what they do better – whether it's responding to incidents, investigating and building cases, or prosecuting crimes.

With comprehensive digital transformation solutions that can be deployed across entire counties and states, NICE also helps everyone work better together, so justice flows more smoothly, from incident to court.
